

Victrex Manufacturing Ltd

Quality Policy

Victrex has a strategy of product leadership and market led innovation. Successful delivery of this strategy requires a deep understanding of our customers and their markets. This then requires an effective Quality Management System to facilitate the development and provision of high quality products and services. To allow Victrex to deliver on this strategy, we will:

- identify and meet the changing needs of our customers, including their quality requirements, by developing and offering leading edge products and services
- use design tools and rigorous governance processes throughout our new product introduction processes
- identify and comply with all relevant regulatory requirements
- operate robust management of change processes, which our customers can rely on to support their businesses
- continuously improve customer service and product quality to meet customer expectations
- respond to customer feedback in a manner which makes the customer feel valued and drives continuous improvement
- provide technical service, to ensure that our customers gain optimum performance and value from their use of Victrex products
- ensure that every Victrex employee is responsible for, and engaged in, improving the quality of our products and processes
