This document confirms that all of the substances, (with the exception of Hydroquinone (CAS# 123-31-9)*, listed within the 'GADSL Reference List - February 2023' have not been intentionally added or used in the manufacturing processes of the VICTREX™ grades listed above and to the best of our knowledge at this time have not been intentionally added or used in the manufacturing processes of any included additives.

* Hydroquinone-(HQ), CAS# 123-31-9; an essential ingredient for PEEK polymer manufacture, is consumed entirely during the polymerisation reaction. HQ has not been detected in our final polymer analysis and measured values have shown to be well below the GADSL reporting threshold of 0.1%
