

## **Victrex plc Modern Slavery and Human Trafficking Statement for the Financial Year 2015/2016**

As required by the Modern Slavery Act 2015 section 54(1) (the "Act"), this statement outlines the steps that Victrex has taken during the Financial Year ended 30 September 2016 to ensure slavery and human trafficking is not present within our supply chains or our own business. Victrex plc is making this statement on behalf of its group companies which are required to make a statement under the Act. It has been approved by the Board of Directors of Victrex plc and signed by Tim Cooper, Executive Director.

### **Our Business and Structure**

Victrex is an innovative world leader in high performance materials, serving a diverse range of markets. Every day, millions of people rely on products or applications which contain our thermoplastic polymers (plastics), from smartphones, aeroplanes and cars to oil & gas platforms and medical devices.

Our headquarters and manufacturing facilities are based in the UK and we are a major exporter (we export over 97% of our material from the UK), with technical and customer support facilities located across our major markets, serving more than 40 countries.

### **Supply Chain Overview**

Our supply chain is primarily focussed on the sourcing of goods, services and raw materials to support the manufacture of polyaryletherketone, with over 2,000 finished product SKU's (stock keeping units). We have over 80 key suppliers based across 14 countries and a Global Procurement Function which is managed from our UK headquarters.

### **Our Policies & Procedures**

Underpinned by our Global Code of Conduct, we are committed to conducting our business ethically and with integrity and we expect our suppliers to comply with our high standards.

During the year, a Modern Slavery & Anti-Human Trafficking Policy has been adopted and rolled out globally to all employees. The policy underpins our zero tolerance approach to slavery and human trafficking and emphasises that the prevention, detection and reporting of slavery and human trafficking in any part of Victrex's business or supply chains is the responsibility of all those working for Victrex, or under Victrex's control. Employees are encouraged to raise any concerns to our Head of Global Supply Chain or through our usual whistleblowing process.

During the year we have rolled out the Victrex Supplier Standards Handbook to all key raw material suppliers and continue to cascade across our supply base. The handbook outlines and expands upon the values core to Victrex and clearly communicates our expectations. It includes specific prohibitions against the use of forced, bonded or involuntary labour, whether adults or children, and requires suppliers to adhere to slavery and human trafficking laws. We encourage our suppliers to cascade these values through their own supply chains.

In ensuring that Victrex supply chain is free of 'Conflict Minerals' our suppliers are expected to supply materials which are 'DRC Conflict Free'. Suppliers are expected to have policies, management systems and conduct due diligence to ensure compliance.

### **Assessment of Risk**

We have conducted a high level exercise to assess specific geographical or industrial sector risk within our supply chain and factor this in to our supplier management activities. Victrex has deployed local resource in the territory which scored highest in our risk assessment.

### **Our People - Recruitment Processes**

We have clear procedures in place designed to ensure that Victrex complies with legal requirements in relation to the recruitment of all employees, including national minimum wage, immigration requirements and other national legislative requirements. Whilst the vast majority of our people are employees of Victrex, from time to time we use specialist third party services to support our requirements across a number of our professional, strategic and operational areas, either through the engagement of consultants or agency personnel. The agencies we work with are required to demonstrate to us that they have conducted our required pre-employment checks.

### **Contractual Obligations**

A review is being conducted of our standard terms and conditions of purchase to include obligations to comply with slavery and human trafficking legislation. We intend to enhance our existing contracts with raw material suppliers to include slavery and human trafficking provisions and to require adherence to the Victrex Supplier Standards Handbook, as well as include appropriate terms in new raw material purchase contracts.

### **Due Diligence & Strategic Supplier Management**

As part of our pre-qualification procedures, suppliers of raw materials are required to complete a Supplier Readiness questionnaire to confirm that they meet our standards. This questionnaire will be updated during Financial Year 2016/17 to build in questions regarding slavery and human trafficking. Raw material suppliers are required to resubmit the questionnaire on a periodic basis.

During the year, we have established a Strategic Performance Improvement Forum to enable active and on-going supplier management. This cross functional forum focuses on suppliers of strategic materials and services, implementing a risk based scorecard approach, evaluated monthly to assess performance based on key criteria, including human rights. This also drives our audit scheduling to be based on a targeted approach to risk for both new and existing suppliers

We focus on supplier monitoring and management, supported by site audits to assess compliance and outline supplier development plans as necessary.

### **Training & Awareness**

We have devised training on slavery and human trafficking which will be rolled out to all key supplier facing employees during the financial year 2016/17. Our Executive Leadership Team has been briefed on the Modern Slavery Act 2015.

### **Measuring Effectiveness**

To assess the effectiveness of the measures we have taken to ensure there is no slavery or human trafficking in our business or supply chain, we will develop key performance indicators during Financial Year 2016/17 and report on them in future Modern Slavery Statements.
